

# User Manual for Integrator

**step 1: Go to the Data Integrator with GUI folder, double click <runGUI.command>. The integrator page will appear.**

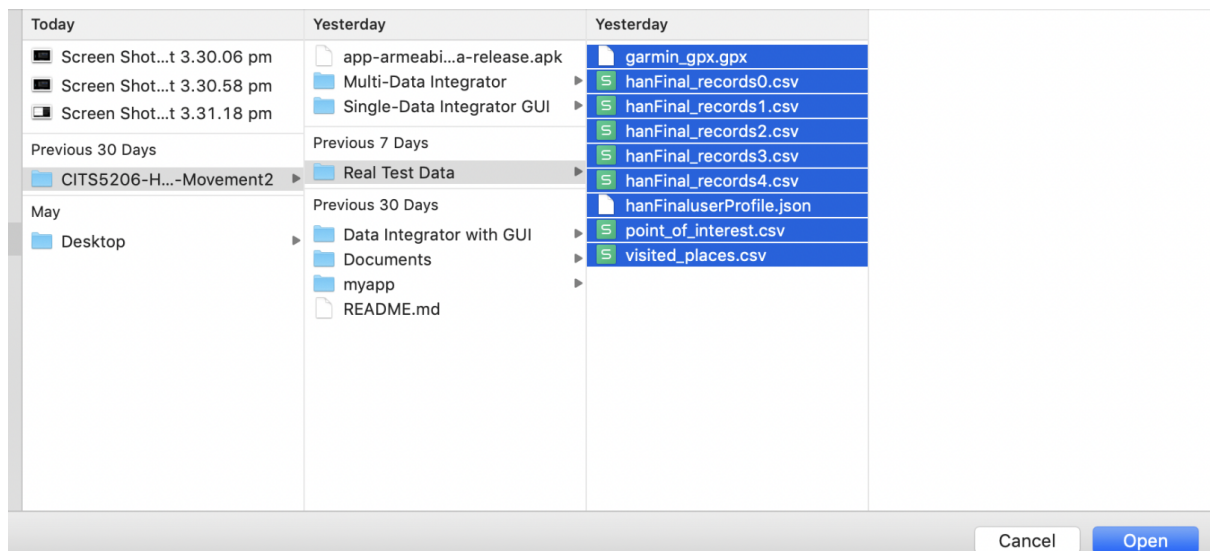

Name	Date Modified
 firstSetup.command	Yesterday at 12:37 pm
 README.md	12 Oct 2021 at 12:57 pm
 runGUI	Yesterday at 2:34 pm
 runGUI.command	Today at 3:30 pm

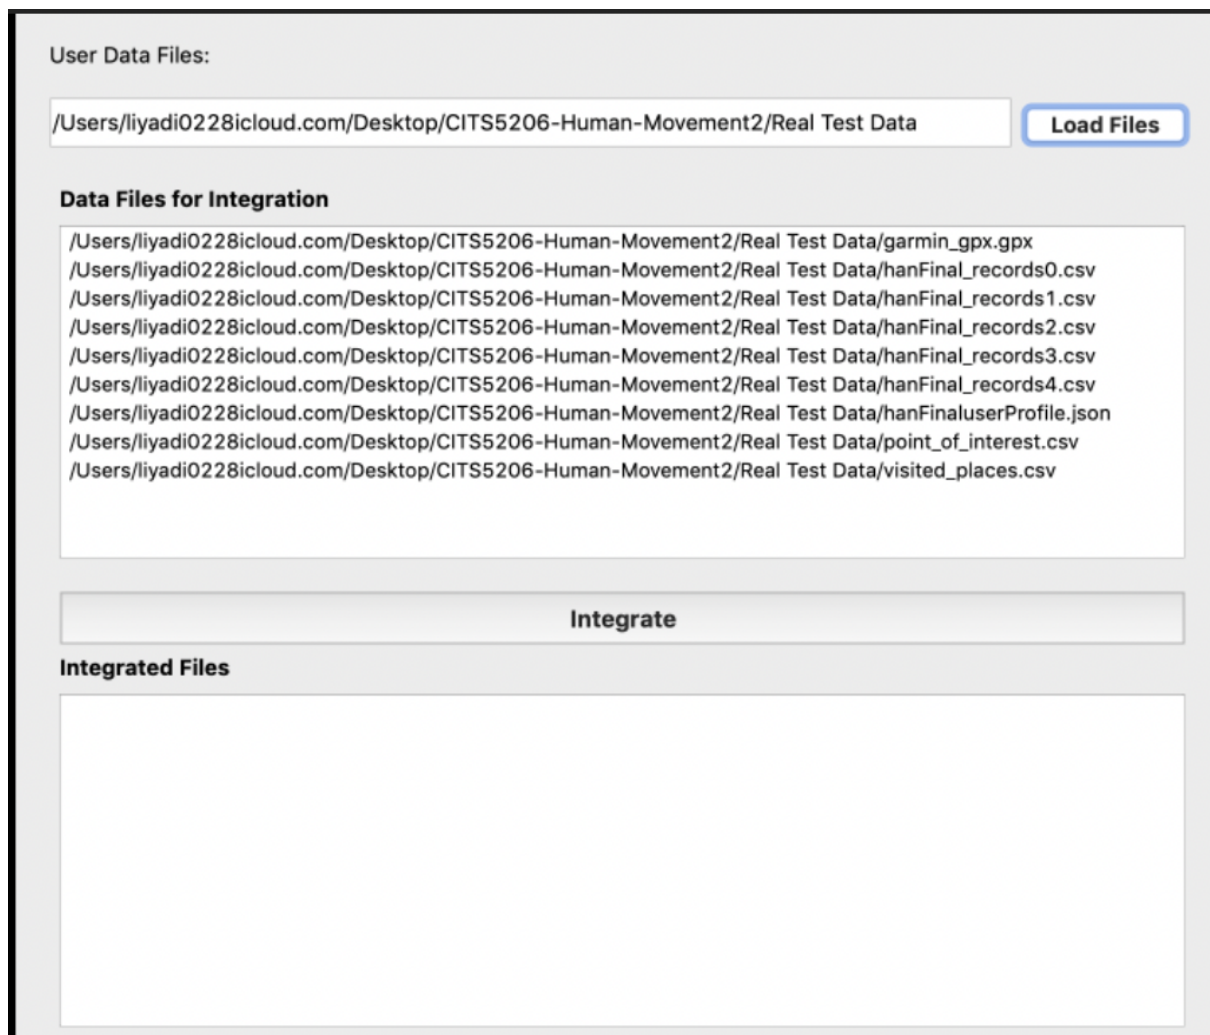

**Step 2: Click the <Load File> bottom, finder will pop up for you to select files (The name has already been pre-set, please do not rename the files while integrating them. ).**

Only files named below will be integrated.

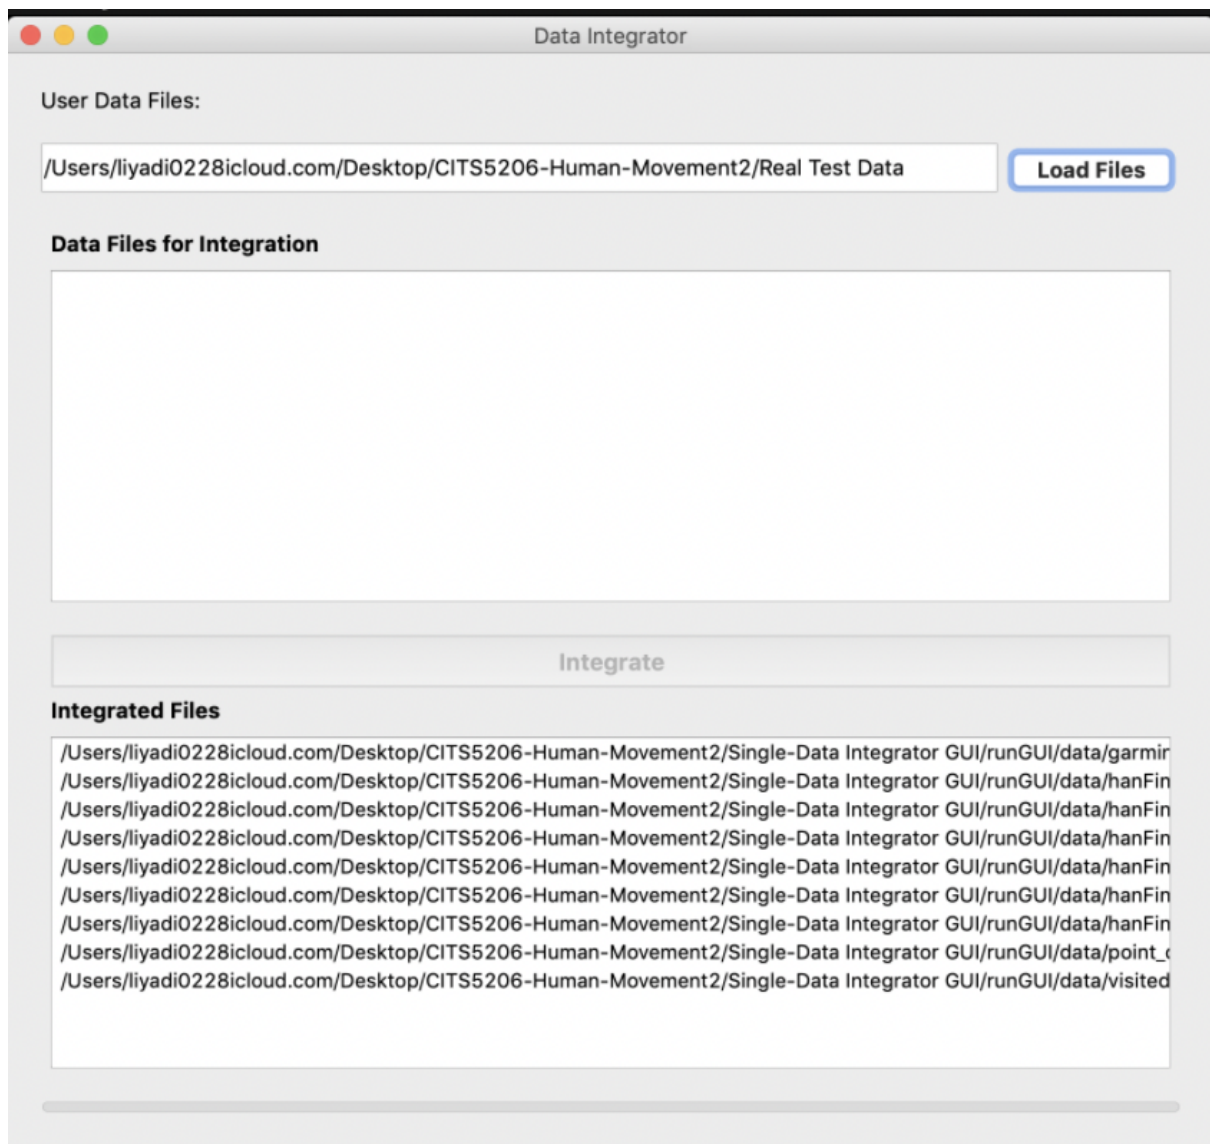

- point\_of\_interest.csv
- <username>\_records<number>.csv (This file is mandatory for every integration)
- visited\_places.csv
- garmin\_gpx.gpx

**Step 3: After file being selected, click the &ltIntegrate> bottom.**

This is how it looks after integrated

**Step 4: Go to the <Data Integrator with GUI> folder, find the <output> folder. You'll find the integrated data.**

The finalData.csv contains the integrated data.
