

User Manual of Integrator

step 1: Go inside the Data Integrator with GUI, double click <firstSetup.command> file.

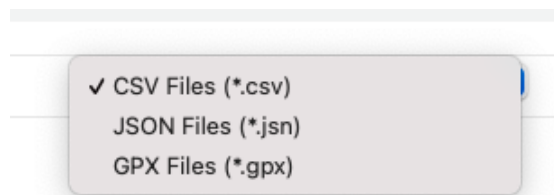

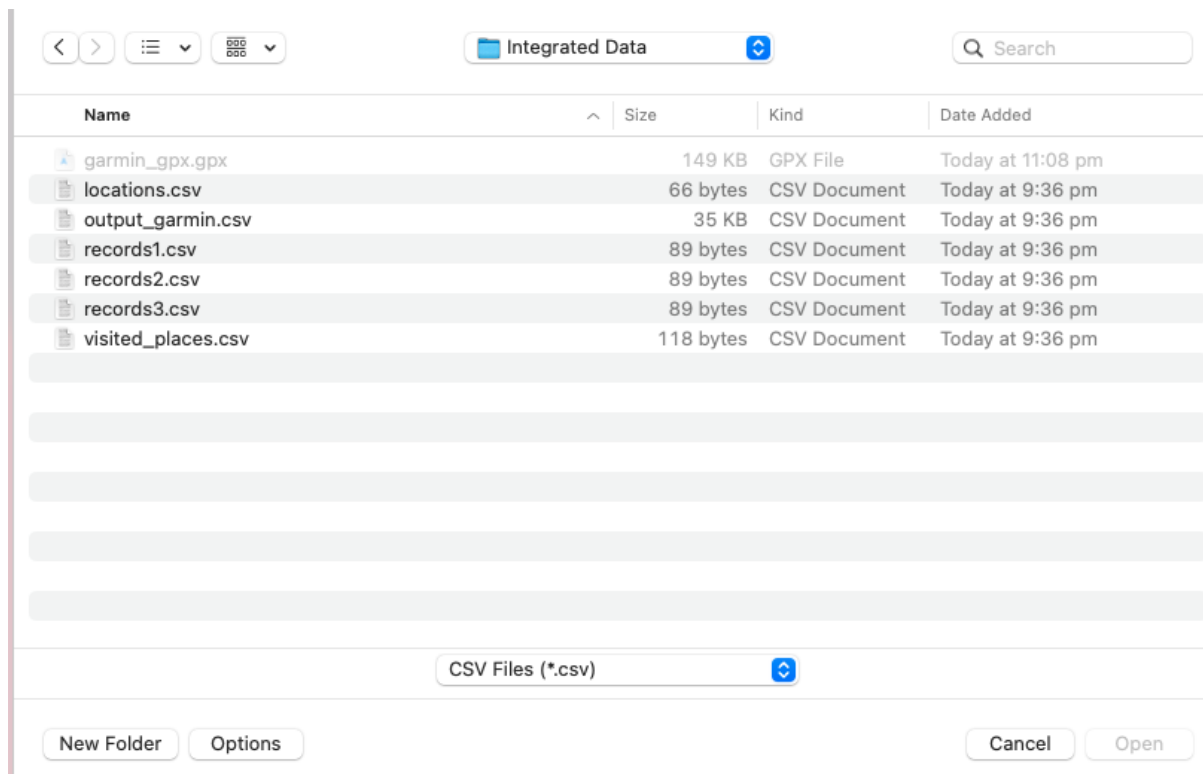

Step 2: Double click runGUI.command. The integrator page will appear.

Step 3: Click the <Load File> bottom, the finder will pop up for you to select files. There are 3 types of data can be selected. (The name has already pre-set, please do not rename the files while integrating them.)

Step 4: After file being selected, click the <Integrate> bottom.

Step 5: Go to the <Data Integrator with GUI> folder, find the output folder. You'll find the integrated data.
